

Whitepops Saathi - New Joiner Training Manual

1. Welcome

Saathi is an AI-powered CRM for managing customer relationships. It syncs with Gmail, classifies emails automatically, and drafts replies for your team.

App URL: <https://whitepops-saathi.vercel.app/>

User Roles:

Role	Access
Owner	Full access to all features
Sales	Inbox, Pipeline, Customers, Reports
Production	Inventory and fulfillment focus

2. Login & Navigation

Login with your email/password or Google account:

Sidebar Navigation

The sidebar is organized into four sections:

Section	Pages
WORK	Dashboard, Inbox, Pipeline, Customers, Reports
CATALOG	Products, Inventory, Samples
ADMIN	Employees (Owner only)
SETUP	Settings

3. Dashboard

Start here each morning. It shows your key metrics and priorities:

What you see:

1. 5 KPI Cards at the top:

- Needs reply — emails waiting
- Drafts to review — AI-generated replies ready
- Samples follow-up — delivered samples needing check-in
- Reorder check-ins — past customers overdue
- AI spend today — budget usage

2. Today's Focus — your highest priority drafts (Edit or Approve & send)

3. Pipeline Pulse — quick view of lead stage distribution

4. Inbox

This is where you spend most of your day. Three-panel layout:

Workflow for new emails:

1. Click a thread from the middle list
2. If not analyzed, click **Run AI Analysis** (AI classifies as relevant/cold/spam/internal/newsletter)
3. Click **Generate Reply**
4. Review and edit the draft (your edits teach the AI!)
5. Click **Approve & Send**

Thread View

Pipeline Stages

Change the stage after every action:

From	To	When
New	Info Sent	After your first reply
Info Sent	Negotiation	When they ask questions
Negotiation	PO	When they send an order
PO	Dispatched	After shipping

5. Pipeline

Visual Kanban board with 5 stages:

The screenshot displays the 'Pipeline' view in the White Pops CRM. The interface includes a sidebar with navigation options like Dashboard, Inbox, Pipeline (active), Customers, Reports, Catalog, and Setup. The main area shows a Kanban-style pipeline with 5 stages: New, Info Sent, Negotiation, PO, and Dispatched. Each stage contains lead cards with details like name, lead ID, and communication history. A 'STAGE DISTRIBUTION' bar at the top indicates the count of leads in each stage. The bottom of the screen shows the user profile for 'PD Sales'.

Stage	Count	Lead Details
New	2	Saurabh (LEAD-0009), Mohan singh (LEAD-0004)
Info Sent	3	amitabh (LEAD-0008), test@test.com (LEAD-0007), Saud (LEAD-0005)
Negotiation	1	Jyoti Dokania (LEAD-0003)
PO	1	Sohan (LEAD-0002)
Dispatched	1	Mahesh (LEAD-0001)

Stage	Meaning
New	Fresh lead, no response sent
Info Sent	You replied with product info
Negotiation	Discussing price, MOQ, delivery
PO	Purchase Order received
Dispatched	Order shipped & delivered

Actions:

- Drag & drop cards between columns
- Click **Add deal** to manually create a lead
- Toggle **Mine/All** to filter by assignee

Create Lead Dialog

6. Customers

Qualified companies you do repeat business with. One customer can have multiple leads over time.

9. Samples

Track sample shipments to prospects.

Status Flow:

1. Pending Dispatch → In Transit → Delivered → Follow-up Sent → Closed

Auto Follow-up: 3 days after marked "Delivered", the AI automatically drafts a check-in email.

Add Sample Dispatch

10. Reports

Analytics with time ranges: 24h / 7d / 14d / 30d / QTD

Key Sections:

- Big Stats — emails handled, reply rate, drafts generated, AI spend
- Conversion Funnel — New → Info Sent → Negotiation → PO → Dispatched
- Inbox Health — daily inbound vs replies
- Source Mix — where leads come from
- Draft Quality — % approved vs edited vs discarded
- Leaderboard — most active leads

PD sales - pd@whitepops...

- Company info (GSTIN, FSSAI)
- **Brand Voice** — 5-10 sentences describing how you write. This directly impacts draft quality.

- Follow-up days, reorder nudge days, daily AI cap, inbox keywords

2. Gmail Connection — shows which inbox is synced

12. Quick Reference

Pipeline Flow

New → Info Sent → Negotiation → P0 → Dispatched

Daily Checklist

- ☐ Check Dashboard for "Needs reply" and "Drafts to review"
- ☐ Inbox → New Mail: process threads
- ☐ Change stage after every reply
- ☐ Check Samples if any delivered

Common Issues

Problem	Solution
Email not appearing	Wait 2 min or click "Re-Sync"
AI draft sounds wrong	Improve Brand Voice in Settings
AI button disabled	Daily cap reached — wait for tomorrow

Glossary

Term	Meaning
Saathi	This CRM app (Hindi for "companion")
Lead	Potential opportunity (LEAD-XXXX code)
Customer	Qualified repeat contact (CUST-XXXX code)
MOQ	Minimum Order Quantity
AWB	Air Waybill (courier tracking)

13. First Day Tasks

1. Login and tour: Dashboard → Inbox → Pipeline → Customers → Reports
2. Inbox: open a thread, read a conversation
3. Find a draft in "Draft Ready" and review it
4. Pipeline: understand the 5 stages
5. Ask your Owner for:
 - Your role confirmation
 - Which leads/customers you own
 - How your team uses the stages

Start with **Dashboard** → **Inbox**. Your AI co-pilot is ready.
